

# The HDMI KVM Switch

## That Saves Your Budget with Easy Management

- Control four HDMI devices with just one mouse, keyboard, and monitor
- Stream video from 4 HDMI sources to 1 display at the same time and control them with the mouse roaming function
- Operate easily with intuitive control methods

### HDMI Switch 4x1 with Multiview & Seamless Function

SC&T's HKM41E is a 4-in-1-out HDMI switch that supports 1080p@60Hz 4:4:4. More than an HDMI switch, HKM41E provides the multiview function for monitoring four audio and video inputs in real time. In addition, with the mouse roaming function, you can directly control the four videos in the multiview mode.

### Reliable Quality Control

SC&T specializes in serving global system integrators and has a high level of trust among its partners. The quality of all the products is carefully controlled, which reassures you when purchasing and employing the products.

The poor circuit design used in an unidentified HDMI KVM switch can result in a significant loss of product performance.

This may lead to:

- Poor picture quality : The picture quality may degrade.
- Connection failure : The input source and the control device cannot connect properly.
- Excessive delay : The images cannot be transferred in real time, and the device cannot operate smoothly.

### HKM41E HDMI Switch Features

#### Multiviewer Mode

HKM41E supports 5 screen-splitting modes, so you can decide which mode to use depending on your needs. Easy to set up, without the hassle of operation.

## Mouse-Roaming

Constantly switching displays and remotely operating devices can be an annoyance. The HKM41E has a mouse roaming function that allows you to move your mouse between split screens and perform operations.

## Changeable Resolution

You can change the output resolution between 720p and 1080p based on the screen.

## Audio Out Selection in Multi-Screen Mode

In the multiview mode, you can select between the audio sources or mute the sound with any control methods.

## Multiple Control Methods

HKM41E supports a wide range of control options.

IR Control

Keyboard & Mouse
