HE01F-4K

Dongle Type

HDMI to Fiber Optic Extender

Why Use Fiber for HDMI Transmission?

The Convenient, Dongle Fiber Extender with Flexible Distance

HE01F-4K Tx/Rx

79 x 20 x 10mm
(31 x 7.8 x 3.9 inch)

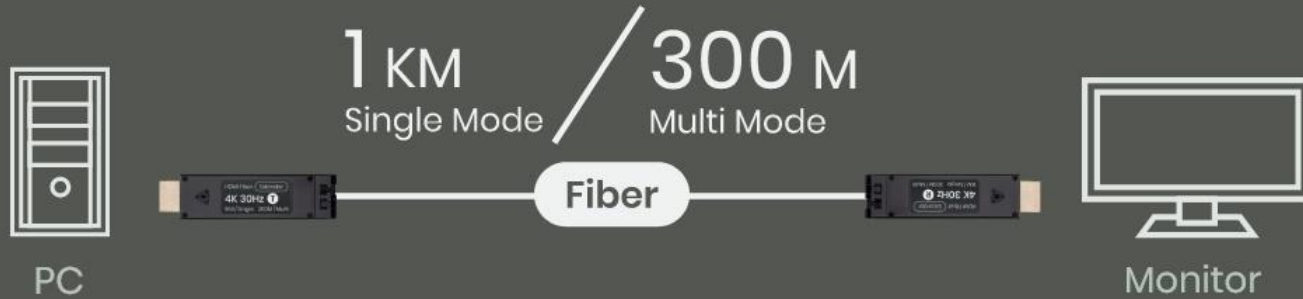

HE01F-4K is a small-size, convenient HDMI over fiber extender. It's an HDMI to fiber device that allows you to transmit an HDMI signal with the minimum, plug-and-play installation. It can also use either multi-mode or single-mode fiber cable to extend the signal via built-in LC connectors.

4K30Hz High Quality Images

HE01F-4K supports 4K30Hz HDMI, compliance with commercial and professional AV market.

Flexible Distance (Medium and Long Distance)

HE01F-4K uses an LC connector, which allows you to have various choices in distance.

- Single Mode up to 300M(984ft)
- Multi Mode up to 1,000M(3,280ft)

*Choose single or multi-module while you're ordering

Dongle Design

HE01F-4K is a Dongle extender, through simple installation, you can use fiber transmit HDMI signals.

Clear Light Indecaiton

HE01F-4K has a light indicator, which you cand check the status though light color, this would make troubleshooting easlier.

With mini USB Adapter in the Box

Although HE01F-4K is a compact-size extender, it's still a active extender, it needed power. Do not worry, we have the adapter in cover. There're two 5V 2A power adapters in the Box, for tranmitter and receiver.
